SECTION A-A
SCALE 1 : 10

DETAIL C
SCALE 1 : 5

Electricity Supply
The decoflame® e-Ribbon Fire needs to be connected to the mains.
Make sure there is a power socket for 230V - 50 Hz installed inside the wall cut-out.

Wall cut-out dimensions

Wall cut-out is made of non-flammable material e.g. fiber plaster boards or bricks.

DETAIL B
SCALE 1 : 2

In order to cool the fireplace and ensure sufficient air flow **DO NOT** seal the gap

Montreal - Open to front and back

General Installation Guidelines for "decoflame® made to measure fireplaces", open to two sides:

It is essential to maintain a 5mm gap all the way around the fireplace (Cut-out = Fireplace Dimensions + 10mm) This gap must not be sealed.

As the edges of the cut-out remain visible it is important that they are done to the highest possible finish. All four corners of the cut out must have exactly a 90 degree angle.

Plasterboard walls - Stud-walls
All surfaces inside the wall cut-out are to be covered with fibre plaster sheets or other non-flammable materials.

Stone/Brick walls
The cut-out is made according to the attached drawing.

Important
Make sure to create a closed cavity for the section below the base plate of the fire and above the roof of the fireplace.

Installation process

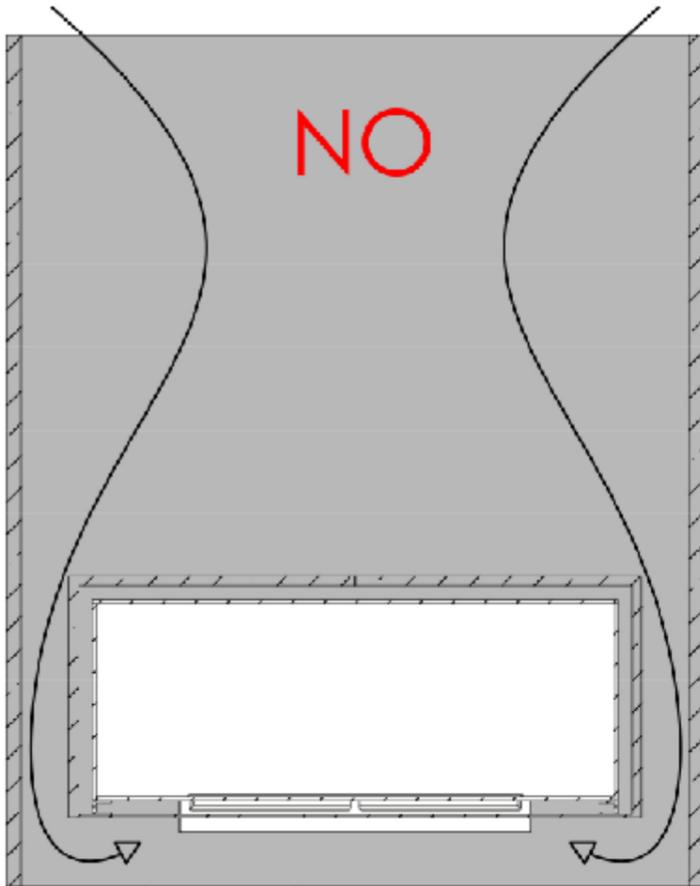

Exploded view showing the installation process.

1. The body of the fireplace is centered in the wall cut out. Sceured with fasteners and use suited wall plugs.
2. Connect the burner to power socket and placed in the safety chamber.
3. Carefully secure the glass with included finger screws. **Remember rubber seals between screw and glass.**

IMPORTANT INFORMATION

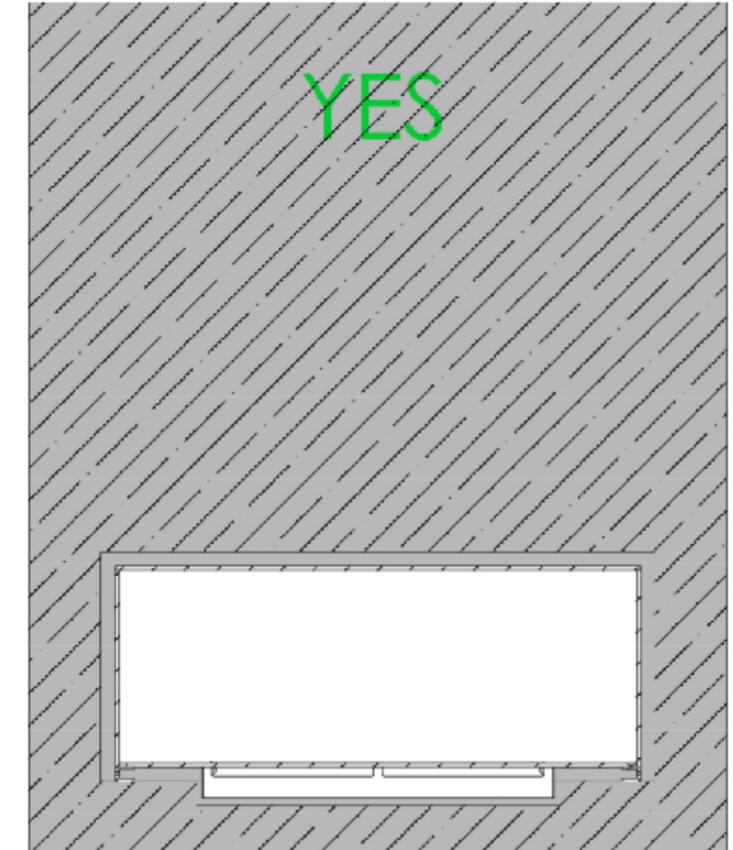

Particulars of the wall in which the fireplace shall be installed

DO NOT! install the fireplace in a wall construction which is open above and below the fireplace. The warm air will cause turbulences inside this hollow construction which will have a negative impact on the flames.

DO! install the fireplace in an open-wall construction, which is closed above and below the fireplace. Make sure to create a closed cavity for the section below the base plate of the fire.

DO! install the fireplace in a massive wall (made of bricks, stone or gas beton) using the wall cut-out dimensions mentioned on the previous page.
